

Design Process: Midterm Project

Just FYI, I took more notes than ever for this project and I feel extremely proud of it.

1. My first step in creating my website, was creating 5 HTML files (index.html, about.html, services.html, trucktiresandwheels.html, contact.html, and a style.css
2. Titled my website; "NTR - Emergency Tire Road Service," then linked the fonts Roboto and Oswald to my as my webs typeface. Then applied an image of a truck as the main cover of my index.
3. In <div class=logo> I linked my images/title.png to every html page I created, while linking back to my index.html.
4. After recreating the businesses logo on adobe (saved as a PNG) and applying it to the websites header, I carefully linked all html's to my index.html within my container class. For each UI Li had another link with a different title. Each Nav > UI > Li linked:
 - a. <nav>
 - b.
 - c. HOME
 - d. ABOUT
 - e. SERVICES
 - f. TRUCK TIRES AND WHEELS
 - g. CONTACT
 - h.
 - i. </nav>
5. Before I was able to include the text in <p> in <div class="information">, In style.css, I aligned the text to the left, made Roboto my font, changed the line height to 35px, and created the appropriate margin.
6. In <div class="image"> I linked my image of the truck to my image class, only to float in the center of my
7.
8. </div>
9. I used code h5, h6, very often only to reduce the amount of time I had on this project. Each text transform was uppercase, font weight - normal, and Oswald was my main font for these codes. The margins and font size varied only for purposes of replicating the website the exact way i wanted.
10. In <div class="services_right">, I created an applied the red arrows as a secondary logo that would link to my "services.html" while floating right on the index.html. At first I was a little unsure if I can do it, but if something goes wrong, I would know when to press back.
11. In <div class=services
 - <hr>
 - <h6>ALL MAJOR BRANDS & SIZES IN STOCK - TIRE SERVICE ON-SITE OR ON-CALL AROUND CLEVELAND, OH</h6>
 - <p>National Tire & Rubber Co. provides fast & reliable on-the-road breakdown & emergency truck service for Cleveland, Cuyahoga County & Northeast Ohio. Our highly trained service technicians are available 24 hours a day to get you off the berm and back on the road. Simply call our dispatch center and we're on the way: (216) 749-0070</p>
 - <p>We service tires on the side of the road or at our centrally located service center. We service all commerical trucks from tractor trailers to box trucks and fork lifts and we stock all major commercial tire brands and all standard sizes.</p>
 - <p>With routine service, fleet inspections & preventative maintenance we can keep your truck on the road to save you time and money. We accept all major CHECKs and all major credit cards as well as preapproved credit lines.</p>
 - <h8>GIVE US A CALL TODAY TO GET ROLLING WITH NTR! (216) 749-0070</h8>
 - <hr>

</div>

12. In <div class="services_right">, I created an applied the red arrows as a secondary logo that would link to my "services.html". At first I was a little unsure if I can do it, but if something goes wrong, I would know when to press back.
13. In <div class="services_left"> I linked all service subtitles to my services.html
14. In <div class="base">, I typed a final title for the base of the main body of my index. Subtitled it
15. In <div class="base_left"> I typed in the additional information, while aligning left with a line-height of 35px.
16. In all my footer's, including my index, I created my final <div class="copyright">, only to include the copyright insignia and type at the bottom of each html page <p>© 2012 NATIONAL TIRE & RUBBER CO. ALL RIGHTS RESERVED |</p>
17. I made my way towards the "about.html", and basically did what I did from my last assignment in pizza_pizza,
18. The majority of all other images in my web site floated to the right, including our contact map, which showed the location of NTR. They were all the same sized pixels as they were when I first came across the site and inspected them. Tested out with their margins and
19. Each h5 and h6 in my about.html, "trucktiresandwheels.html", contact.html, and services.html, all share the same styles/coding and
20. I aligned my text to the left with a margin (50px 800px 0px 15px) under my <div class="about_left."> This time, the font was Roboto for purposes of distinguishing hierarchy in text/body copy.
21. In <div class="Information">
22. In <h8>, all fonts are labeled as Oswald and share the same color, only for the fact that they're all phone numbers. Which made it easier for me to replicate.
23. Just to be clear, all information in my header's margin from my <div class=container> class remains the same in each html. All div-classes are completely different names for organization purposes only.
24. In my "trucktiresandwheels.html", despite organizing the text on the left, I worked on trying to apply bullet points to all the brand items
25. In my contact.html, I linked the map location to my <div class= "contact_right"><iframe width="600" height="500" id="gmap_canvas" src="https://maps.google.com/maps?q=The%20National%20Tire%20and%20Rubber%20Co&t=&z=13&ie=UTF8&iwloc=&output=embed" frameborder="0" scrolling="no" marginheight="0" marginwidth="0"></iframe></div>
26. In my contact.html, I aligned the text to the left with a red cover title, a short subtitle, and then displayed the font at Oswald.

<p>Based in Cleveland, Ohio we are Cuyahoga Counties largest commercial tire dealer and service center. Through hardwork and great customer service we have grown over the decade from a single service truck to a fleet of always-ready roadside technicians.</p>

<p>NTR is the go-to choice for OTR roadside assistance as well as fleet maintenance & preventative inspections. Our job is to keep your trucks on the road, reducing down time and your cost-per-mile.</p>

<p>We are available 24 hours a day, 365 days a year to respond to your roadside breakdowns and service needs. Simply call our dispatch center and we'll send a highly trained technician directly to you.</p>

<p>NTR does not require any memberships, registration, or pre-arranged contract so you only pay for the service you need. We accept all major credit cards and checks to make sure payment isn't an issue.</p>

<hr>

<h8>PLEASE CALL (216) 749-0070 FOR SERVICE TODAY</h8>

<h5>FLEET INSPECTIONS & PREVENTATIVE MAINTENANCE</h5>

<h6>AVOID ROAD FAILURES AND PROLONGED ROADSIDE INSPECTIONS</h6>

<p>In the transportation industry it's crucial to keep your trucks rolling and this starts with proper inspections.</p>

<p>Our technicians perform detailed inspections to avoid failures on the road and prolonged roadside inspections from motor carrier enforcement. Oftentimes drivers may be rushed or just not as detailed in their inspections and this leads to downtime.</p>

<p>Our technicians identify problems before they lead to failure. Contact us today to setup a fleet inspection and see why our technicians & customer service have made us the largest commercial tire & service center in Cuyahoga County.</p>
